Our Vision

To become a globally trusted exporter of eco-friendly Areca Leaf Products by promoting sustainable living and delivering natural, biodegradable alternatives to the world market. We aim to create a greener future through innovation, quality, and environmental responsibility.

Our Mission

- To manufacture and export premium-quality Areca Leaf Products that meet international standards.
- To provide sustainable and chemical-free food packaging solutions.
- To support environmental conservation by reducing plastic usage worldwide.
- To build long-term relationships with global customers through trust, consistency, and excellent service.

Uses Of Areca Leaf Products

- Used as dinnerware in Functions, restaurants, cafe, birthday parties, kitchenware.
- Used for packing purposes
- Sturdy and light which makes it possible to use in buffet parties.
- Can be used in microwave for warming food.

What Is **Areca Leaf** ?

Areca leaf is a natural leaf sheath collected from the **Areca Palm Tree**. These leaves naturally fall from the tree and are then cleaned, heat-pressed, and shaped into eco-friendly products like plates, bowls, trays, and food containers.

Areca leaf products are:

- 100% biodegradable
- Eco-friendly
- Chemical-free
- Compostable
- Strong and durable
- Safe for hot and cold food

Because they are made from naturally fallen leaves, no trees are cut during the process. Areca leaf products are widely used as a sustainable alternative to plastic and paper disposable tableware across international markets.
